

Michael J. Ryan, Ph.D.

Regents Professor of Integrative Biology

The University of Texas at Austin

Born in 1953 in New York City

Studied Neurobiology and Behavior at Cornell University and Zoology at Rutgers University

PROJECT

The Evolution of Natural Beauty

Sexual selection by female choice has generated some of the more spectacular and aesthetically pleasing traits in the animal kingdom. Yet outside of the field of sexual selection, there is only a very poor understanding of how evolution generates these traits. I will begin work on a book that will bring this stimulating field of evolutionary biology to a larger, well-educated lay audience.
